

Usage Warnings

Usage Warnings and Alerts

SpinTel helps you stay on top of your usage by sending timely alerts for shaped and excess data plans throughout your billing cycle.

Usage Notifications

If you're on a capped plan, you will receive alerts when your usage reaches **50%**, **85%**, and **100%**

These notifications are designed to help you manage your data and avoid unexpected charges. Please refer to this guide to [enable/disable usage notifications](#).

 Please note: Usage data may take up to 48 hours to update, though most updates occur within one hour.

For **mobile and international roaming**, usage may take longer to reflect due to delays in reporting from overseas networks.

Viewing Your Usage in My Account

You can [check your usage](#) at any time by logging into **My Account**. Detailed usage information is updated regularly, but may take up to **48 hours** to fully reflect recent activity.

Understanding Pro-Rata Usage

If you start your plan partway through the month, your charges and inclusions will be adjusted on a pro-rata basis, meaning you'll only pay for—and receive—what you use.

Example:

If you sign up for a **\$40/month plan with 10GB** on **June 15**, you will receive:

- **5GB of data** to use between June 15–30
- A **\$20 charge** (half of the full monthly cost)

Your full plan inclusions and charges will begin on the first day of the following month.

Excess Usage Charges

Going over your plan allowance can result in additional charges, which can be costly depending on your specific plan.

As plan allowances and rates differ across products, we recommend reviewing your Critical Information Summary (CIS) in your order confirmation email to understand the potential costs if you exceed your limits.
