

Linphone for Windows Setup

1. Download Linphone [here](#) and install it.
2. After the successful registration, launch Linphone and go to "Options", "Parameters".

3. Select "Manage SIP accounts" and click "Add".

4. Enter the following settings and click "OK".

SIP Identifier: xxxxxx@voip.syd.spintel.net.au (replace xxxxxx with your SIP number)

SIP-proxy address: voip.syd.spintel.net.au

Registration timeout: 300

The screenshot shows a window titled "Linphone - Configure a SIP account". The window contains the following fields and options:

- Your SIP identity: sipxxxxx@voip.syd.spintel.net.au
- SIP Proxy address: sip:voip.syd.spintel.net.au
- Registration duration (sec): 3600
- Transport: UDP
- Route (optional):
- Contact params (optional):
- AVPF regular RTCP interval (sec): 5
- Register
- Publish presence information
- Enable AVPF

At the bottom right, there are two buttons: "OK" and "Cancel".

Enter the SIP number, password, and click "OK".

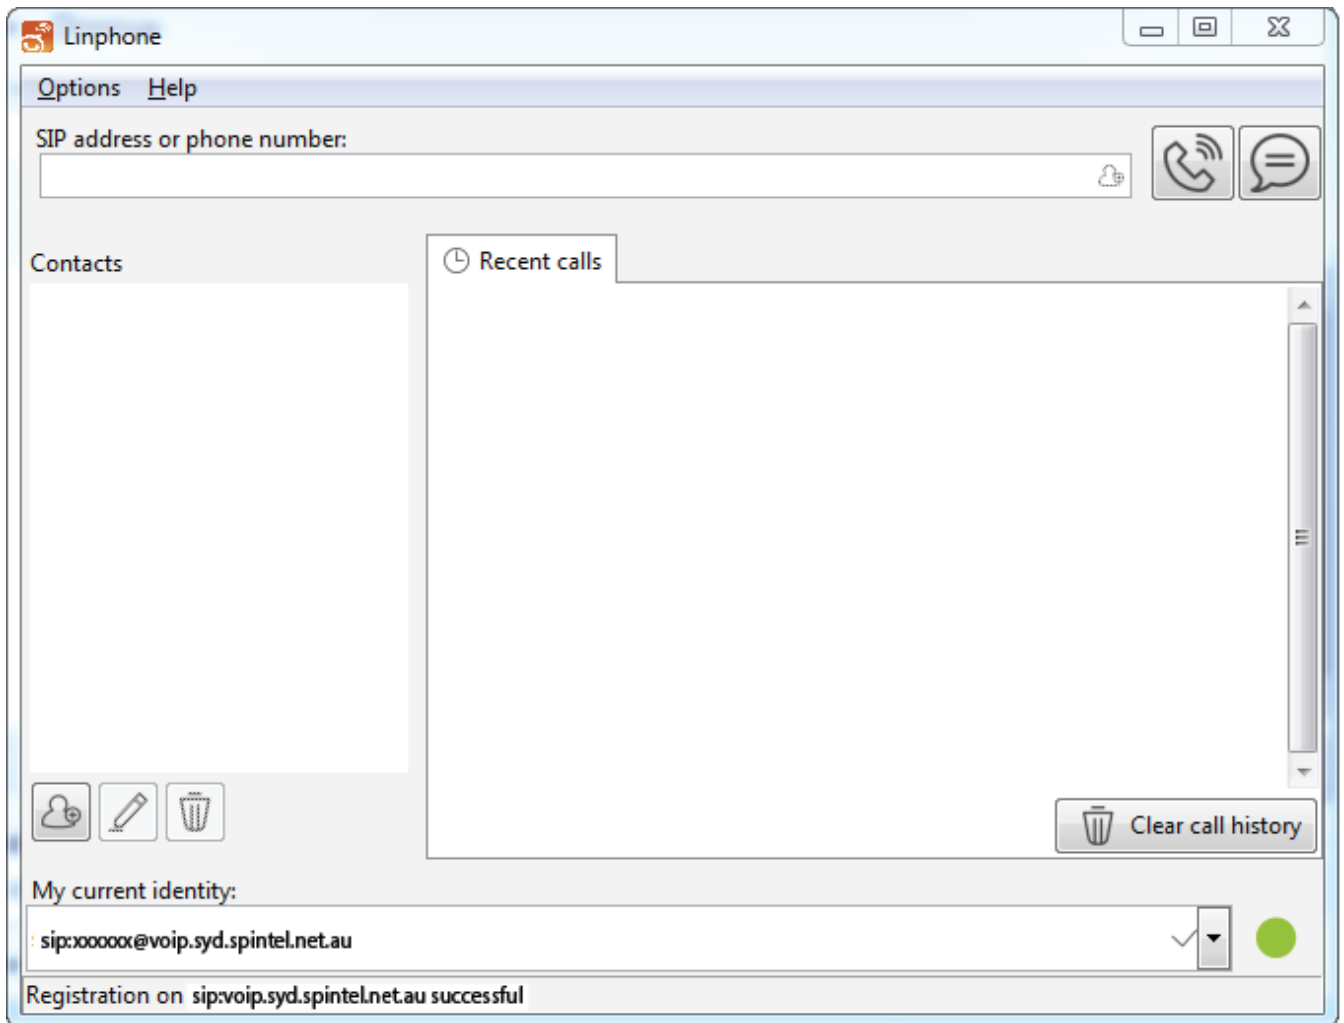

The screenshot shows a window titled "Linphone - Authentication required". The window contains the following text and fields:

Please enter your password for username xxxxxx
at realm voip.syd.spintel.net.au

- UserID: xxxxxx
- Password: [masked with dots]

At the bottom, there are two buttons: "OK" and "Cancel".

5. Click "Done".

6. If settings are correct, the "Registration is successful" message will appear at the bottom of the page.
