

Setting up your Netcomm NL1901ACV Modem for Home Wireless Broadband

Wireless Broadband service

This type of service provides high-speed internet and data service delivered through a **wireless** local area network (WLAN). Image below shows physical setup for this type of service.

Note: For new customers, make sure to activate the SIM card online first by visiting our [activation page](#).

Configure the modem as shown below:

1. To access modem's interface, please make sure your device is connected to the modem (wired or wirelessly) and enter **192.168.20.1** into the browser address bar.
2. At the login screen, type admin into the Username field, and type the modem serial number into the Password field then click on OK. The modem serial number can be found on the bottom of the hardware that should have the admin login details.
3. Click on **Advance Setup** then **Mobile Broadband**.

4. Configure modem settings:
 - a. If this is the **first time you are setting up the modem** to the network, click on **Edit**

Wide Area Network (WAN) Service For Mobile Broadband Setup
Choose Add, Remove or Edit to configure a WAN service For Mobile Broadband interface.

Interface	Description	Type	Vlan8021p	VlanMuxId	Igmp	NAT	Firewall	IPv6	Mld	Manage	Edit	Action
