

Configuring your Home Phone on a Netcomm NF18ACV NC2 firmware version

1. Log in to the router interface by typing **192.168.20.1** on a browser. Once in, you will be prompted for admin access. Use "admin" for both username and password.

A screenshot of a web-based login interface for a Netcomm router. The background is a solid blue color. In the center, the text "LOGIN TO YOUR DEVICE" is displayed in white, uppercase letters. Below this text, there are two white input fields. The first field is labeled "Username" in white text and contains the text "admin". The second field is labeled "Password" in white text and contains six black dots. To the right of the password field, there is a white button with the text "Login >" in blue. The entire interface is centered on the blue background.

LOGIN TO YOUR DEVICE

Username

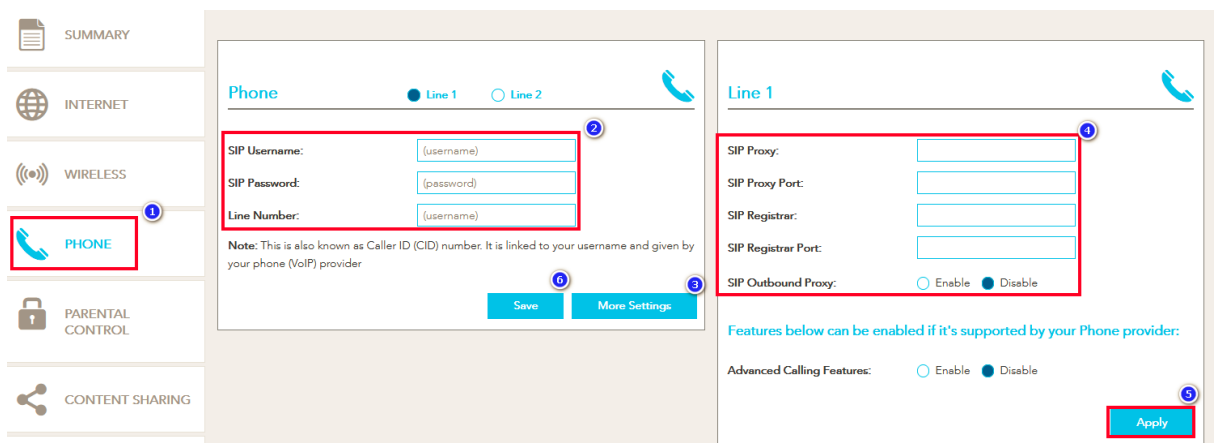

Password

Login >

2. You will then be brought to the main page. On the left-hand panel, click on '**Phone**'.

3. The configuration page will then be shown.

1. Check your email for the phone credentials. Enter the username on the **SIP Username** and **Line number**, then the password on the **SIP password** field respectively.
2. Next, click on **More Settings** to see the rest of the setup.
3. Enter the following details:

SIP Proxy: 203.23.236.96
SIP Proxy Port: 5060
SIP Registrar: 203.23.236.96
SIP Registrar Port: 5060

Note: Other devices may ask for details such as **Authentication Number or other numbers**. Always use your **SIP Username** (provided in the email) and **NOT** your telephone number.

4. Click Apply and then Save.
5. After saving your setup, your VoIP home phone service will then attempt to connect. You will know it is successful when you can see the status as "Up"

Otherwise, check if the phone light on your modem is ON. Restart your modem and check the connection points, make sure to plug the

cable to the correct phone port of your modem (*i.e., use phone port 1 for Line number 1*).
