

Windows Mail Setup

Note: Windows Mail is no longer supported by Microsoft, hence it is best to use the newer applications.

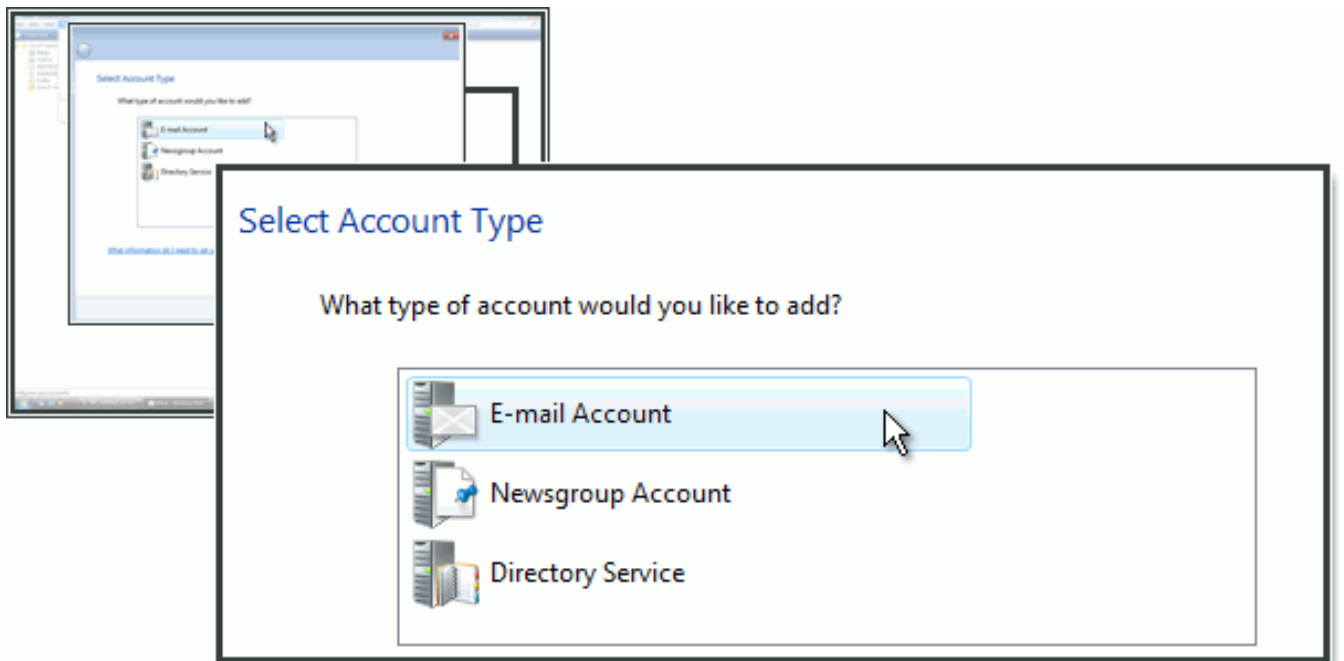

1. Open Windows Mail and select **Tools**, then click on **Accounts**.

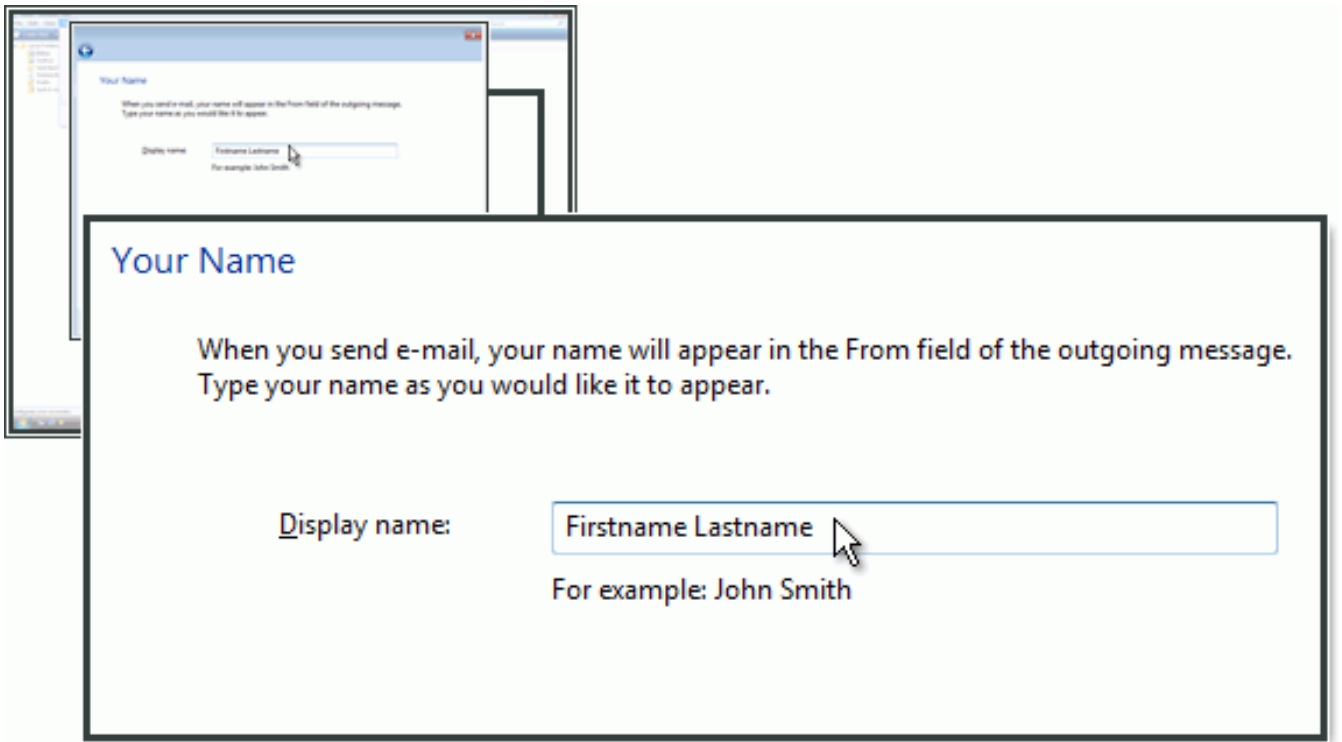

2. Click on **Add**.

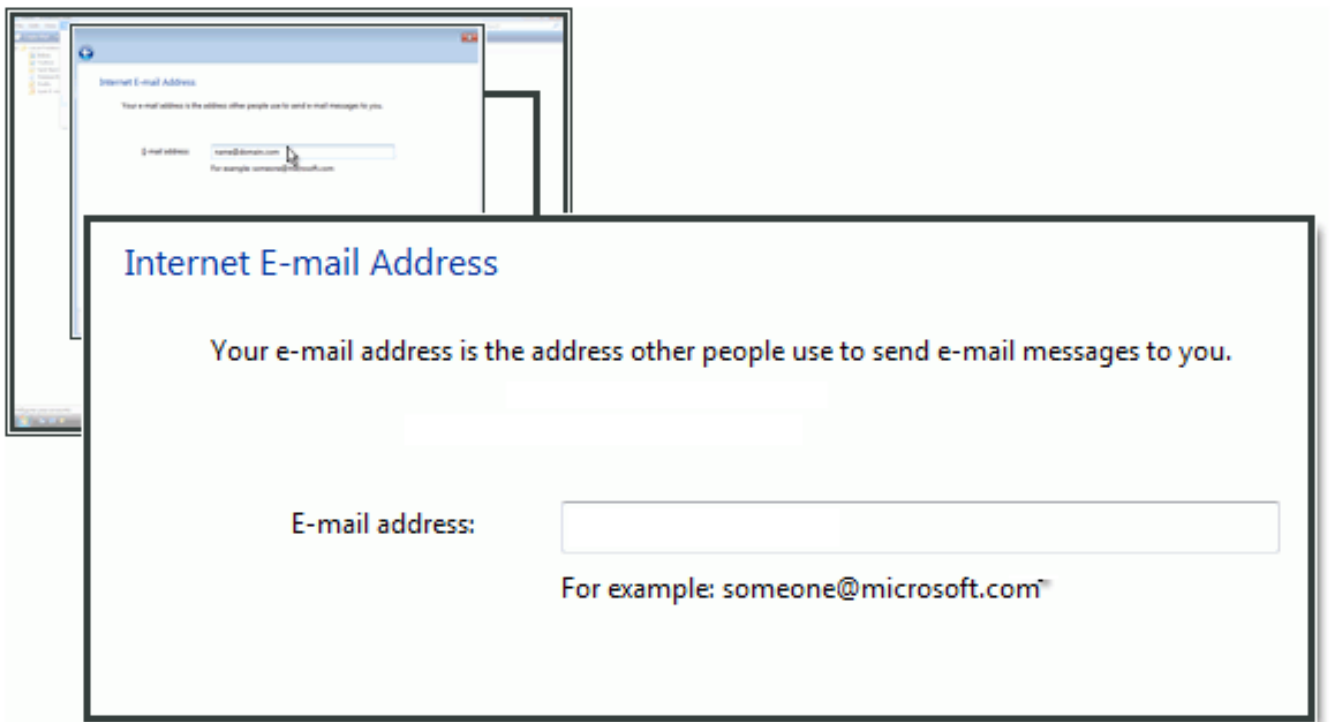

3. Choose E-mail Account and click on **Next**.

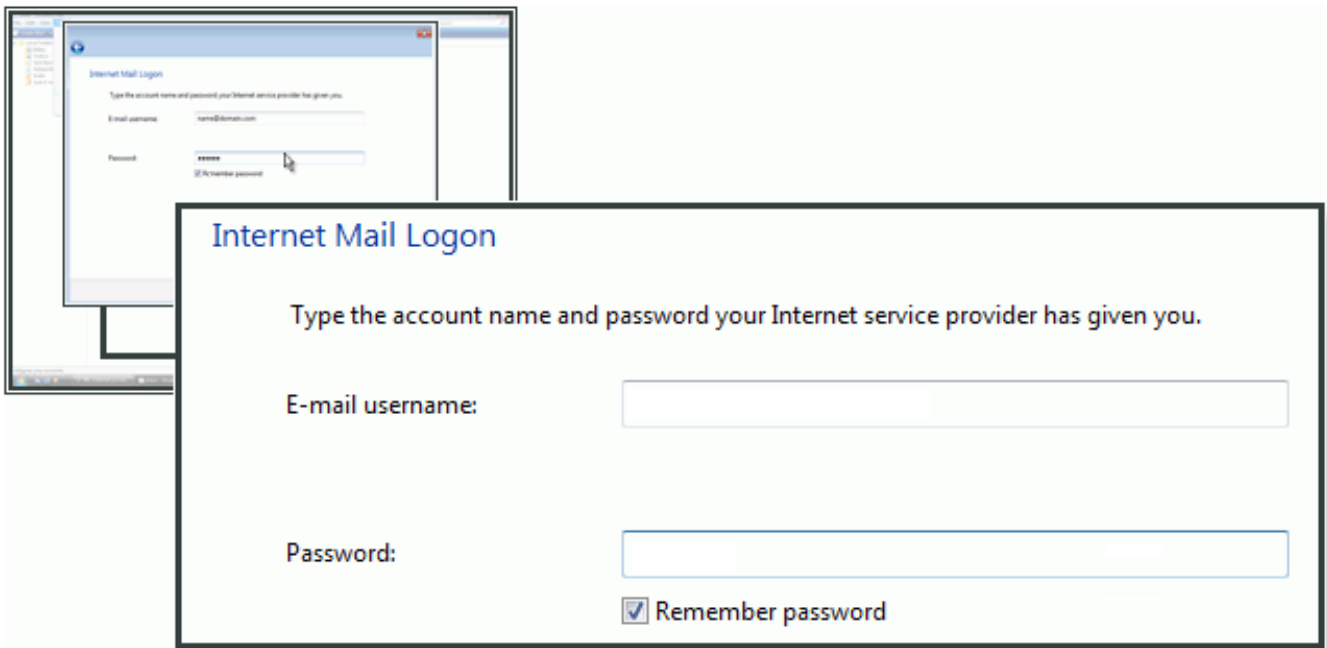

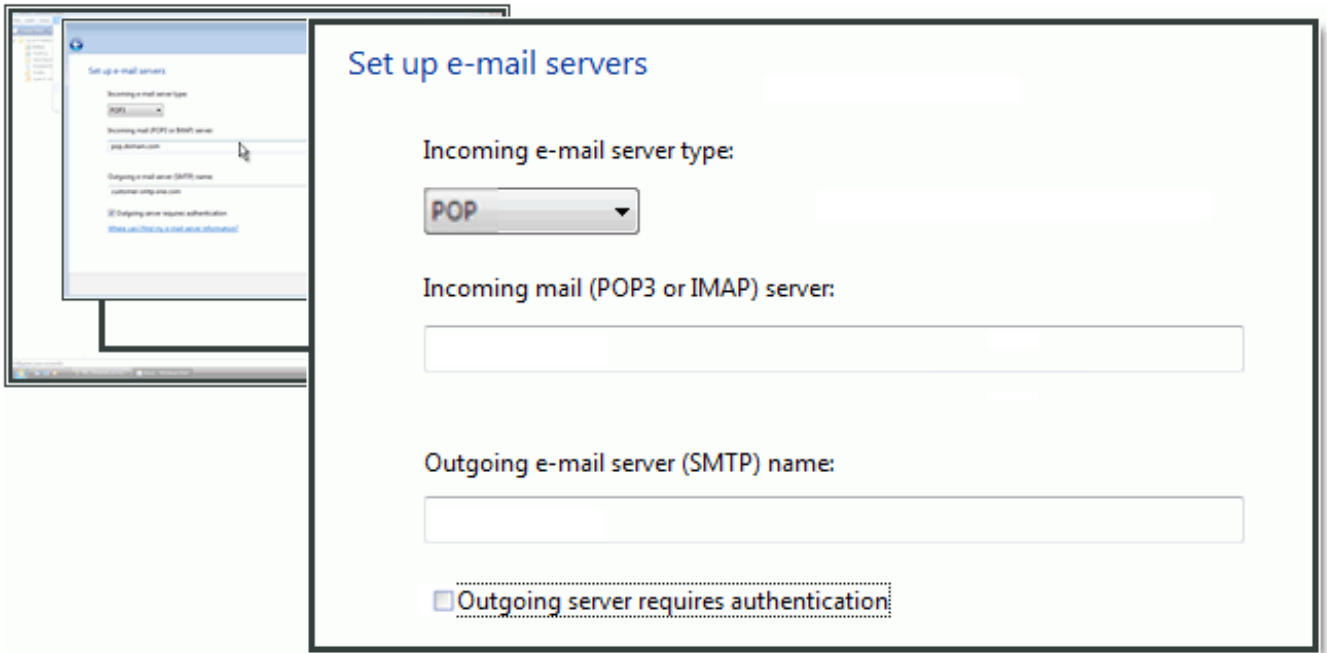

4. Enter your Display name and click on **Next**.

5. Enter your E-mail address and click on **Next**.

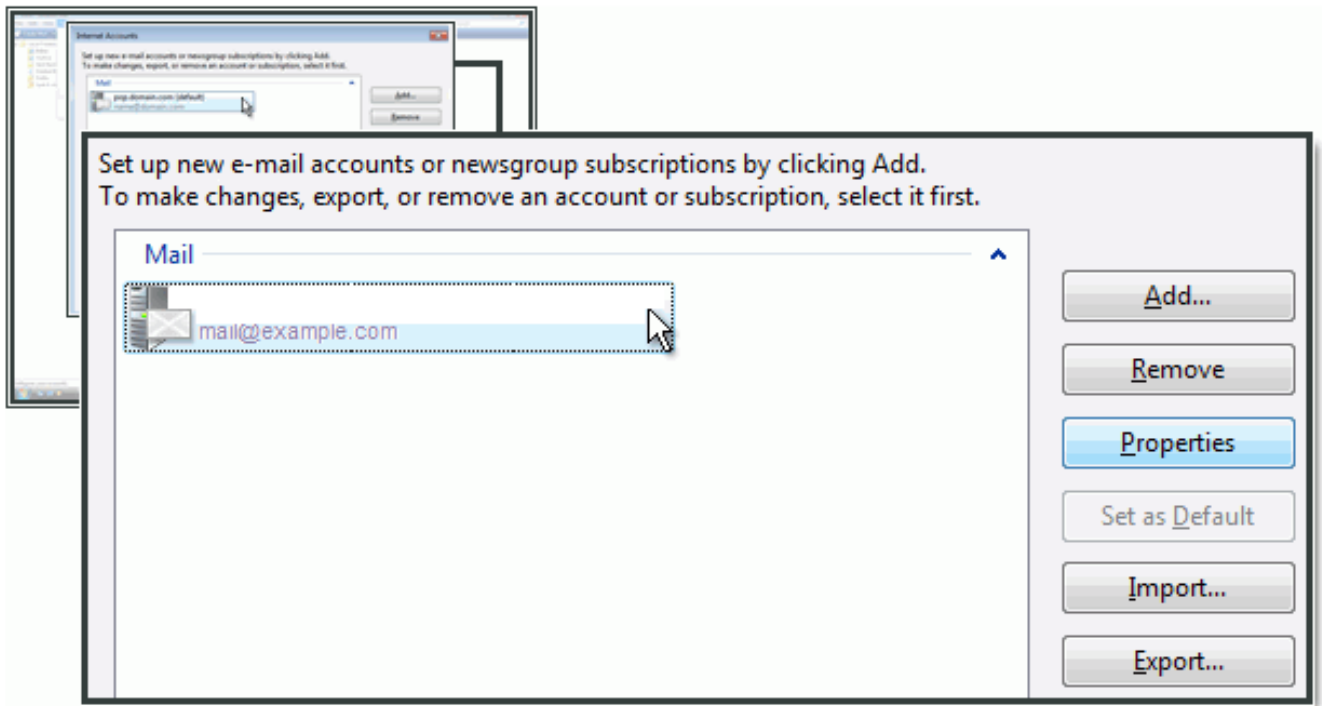

6. Select **POP** as the **Incoming e-mail server type** and enter pop3.spintel.net.au in **Incoming mail server**. For **Outgoing mail server**, enter smtp.spintel.net.au.

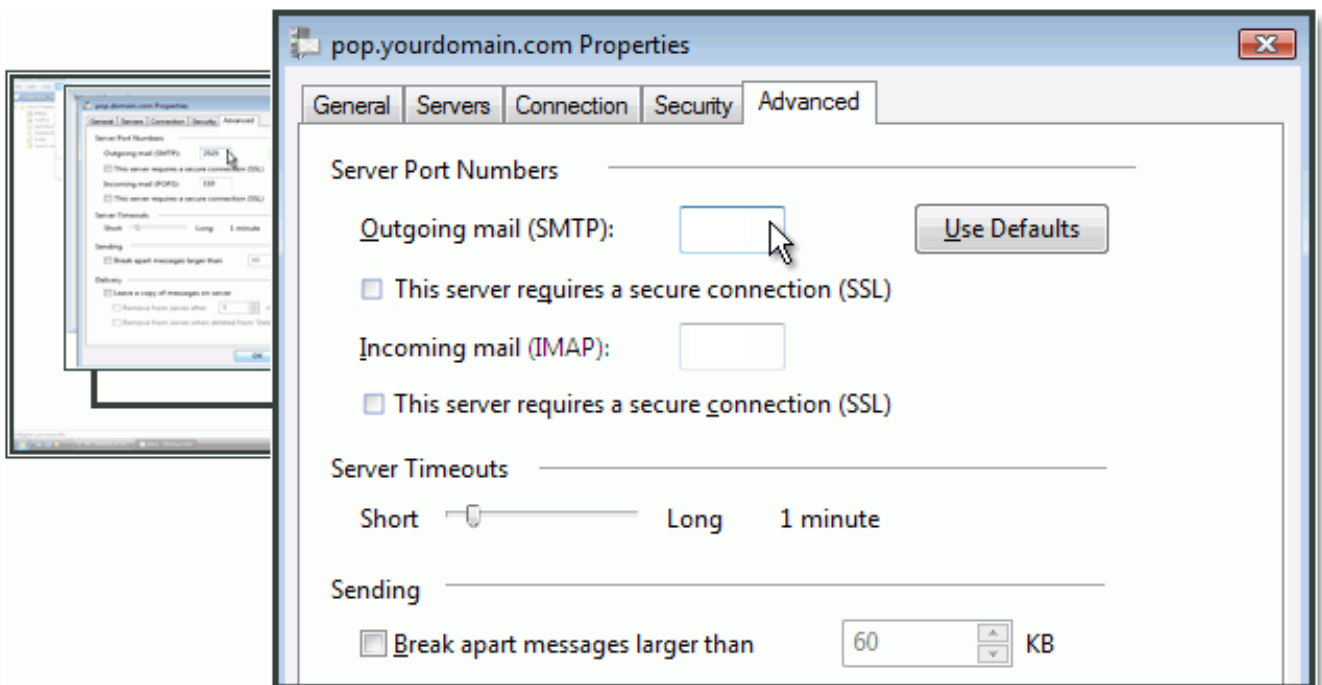

You have completed the setup. Click on **Finish**.

Configuring SMTP server in Windows Mail

1. Select your newly created account and click on **Properties**.

2. Select **Advanced**. In **Outgoing mail (SMTP)** enter 25 and 110 in **Incoming mail**.

Click on **OK**.
