## **White Pages Listing**

## How do I request to add/remove my number from the White Pages directory?

An unlisted number (or 'silent line') provides you with a way to increase your privacy. This means that if you have a silent number, your number won't be listed in the White Pages directory or directory-assisted services.

To enable/disable this feature, access your online account.

1. On the dashboard, click on **Manage Service** on your phone service.

2. Scroll down to Service Management and select Change service settings

3. Scroll down to Configure Settings and toggle Silent Number on/off

4. Click **Update Settings** to apply the changes.

For Business listings, please contact White Pages directly.

Note: New listings will be included in the next version of the printed White Pages.
