TP-Link HX510 Set Up Guide - Wirelessly

The Whole Home Mesh Wi-Fi AP system is designed to extend your network coverage across your entire home. It consists of a Main AP that connects to a wired router, modem, or gateway, and one or more agents that extend the wireless coverage.

Empowered by EasyMesh technology, HX510 provides a strong WiFi signal in every corner of your home. Wireless connections and optional Ethernet backhaul work together to link each unit, providing even faster network speeds and truly seamless coverage with one WiFi name.

Click to expand each section and discover detailed information on the HX510, including setup guides, features, and troubleshooting tips to help you maximise your device's potential.
