

# How to Configure the APN Settings for Netgear AC810 to connect SpinTel 4G Home Internet

For the SpinTel Internet connection, you must manually configure the Access Point Name (APN) settings on your NETGEAR AC810. Follow these instructions to manually configure APN settings.

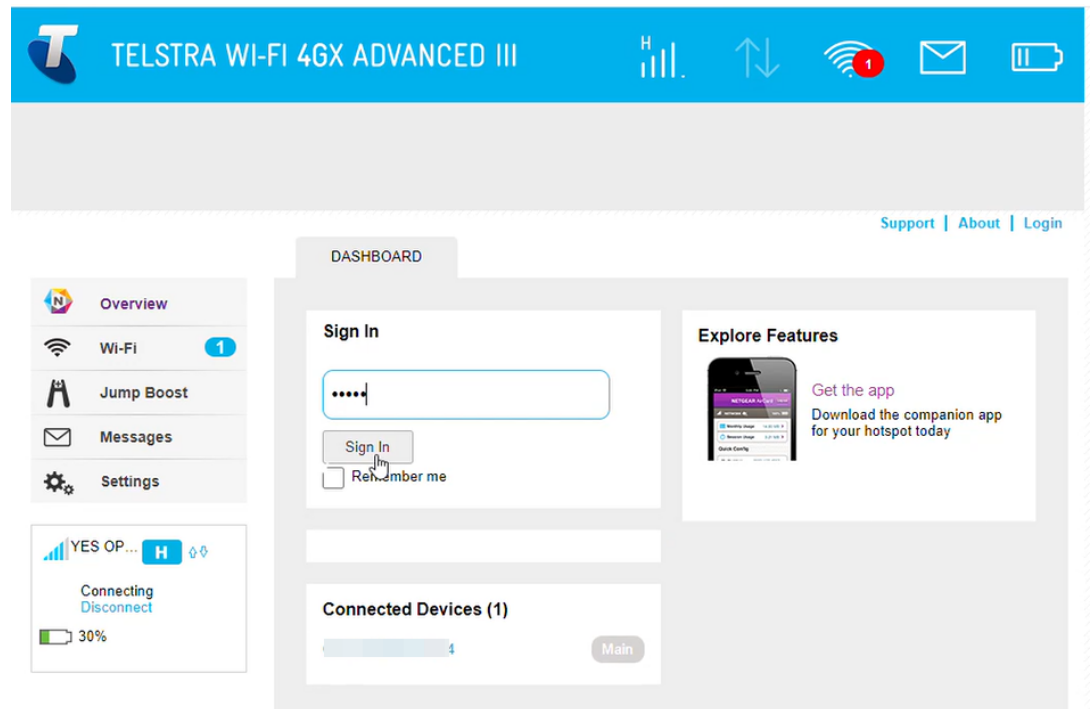

1. Press and release the Power button to restart your AC810.
2. Connect to the modem's Wi-Fi network
  - Make sure your device (Mobile/Laptop/Computer) is connected to the modem's Wi-Fi network. The Wi-Fi name and password are displayed on the LCD screen as shown below.

## 3. Sign In to the Dashboard

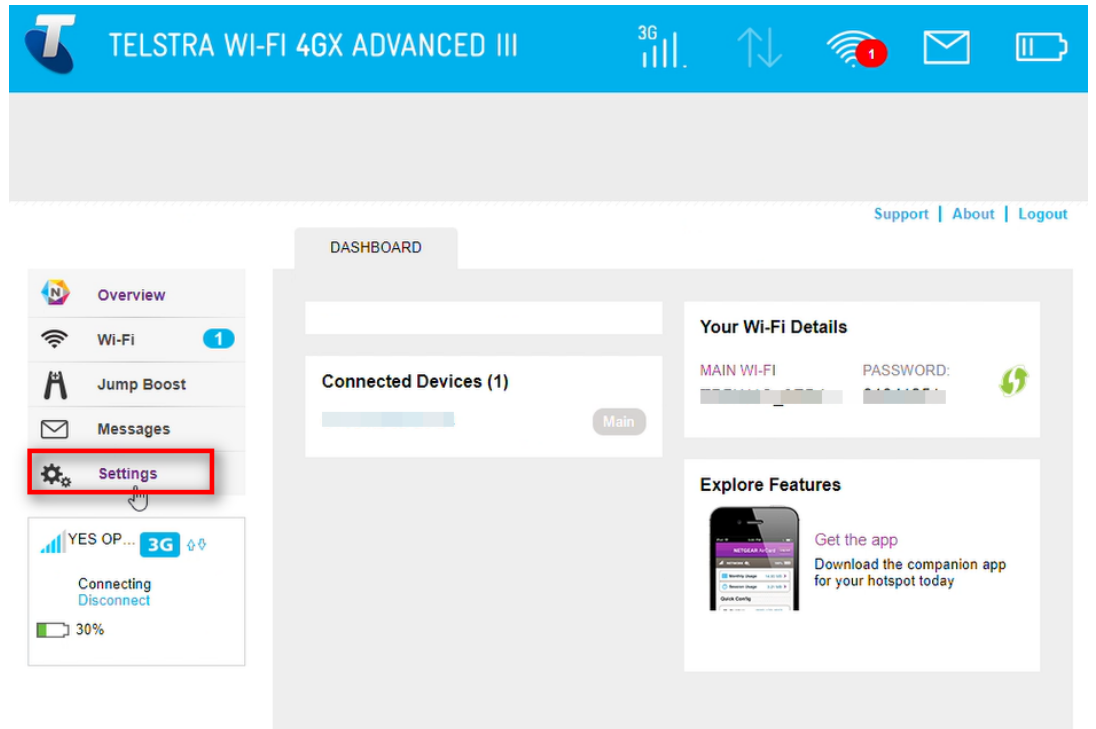

- Open a web browser on your device and enter <http://m.home> in

- the address bar or [Click here](#) to access the dashboard.
- Sign in using the password: **admin**.

#### 4. Access Settings

- Once logged in, locate the menu on the left side of the dashboard and click on **Settings**.

## 5. Navigate to the Network Tab

- Within the Settings menu, find and select the **Network** tab.

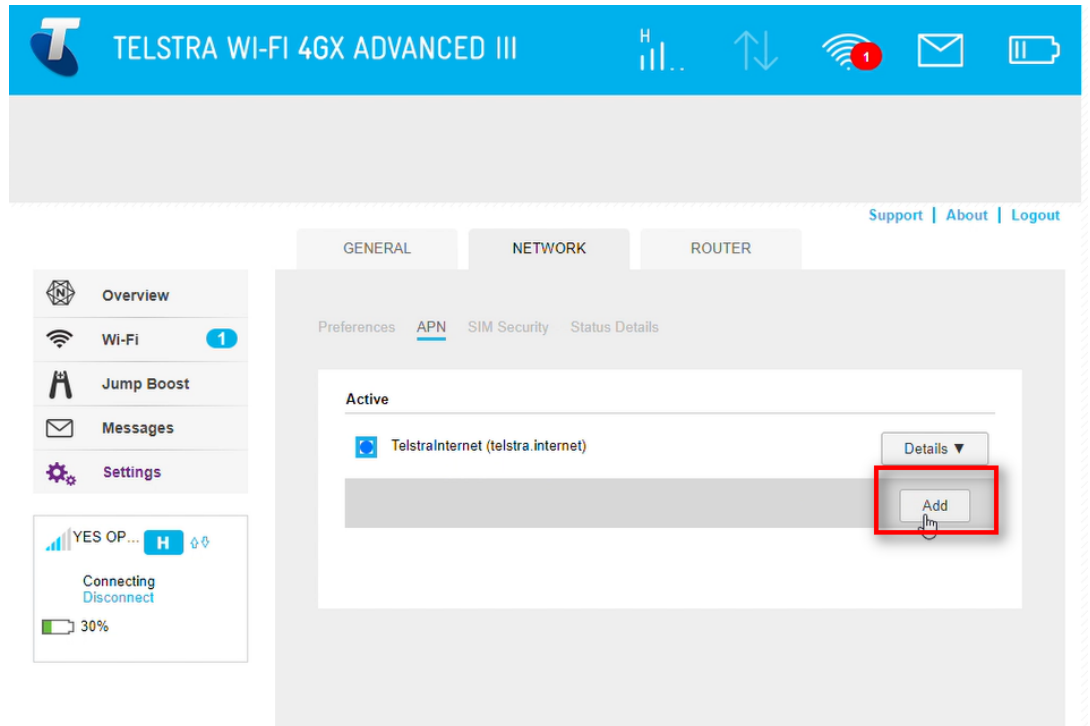

## 6. Select APN

- In the Network tab, locate the **APN** section.
- Click on **APN** to manage Access Point Names.

## 7. Add a New APN Profile

- Click the **Add** button to create a new APN profile.

## 8. Input APN Details

- In the Name field, enter **Optus**.
- In the APN field, enter **connect**.

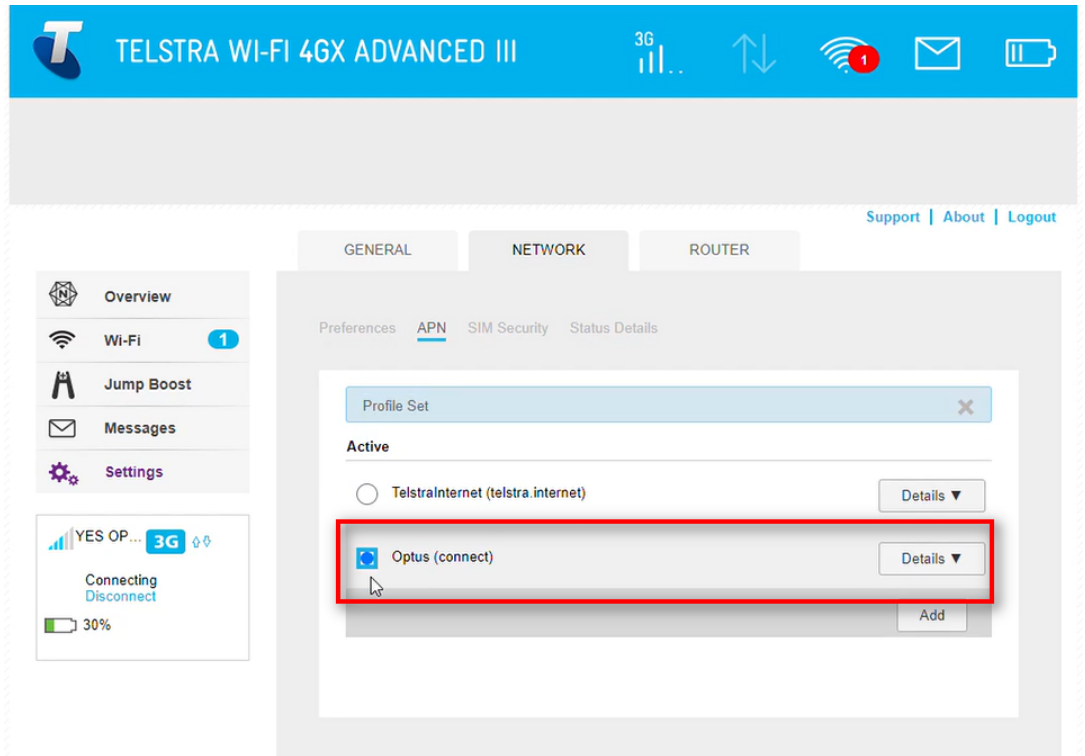

## 9. Save the New Profile

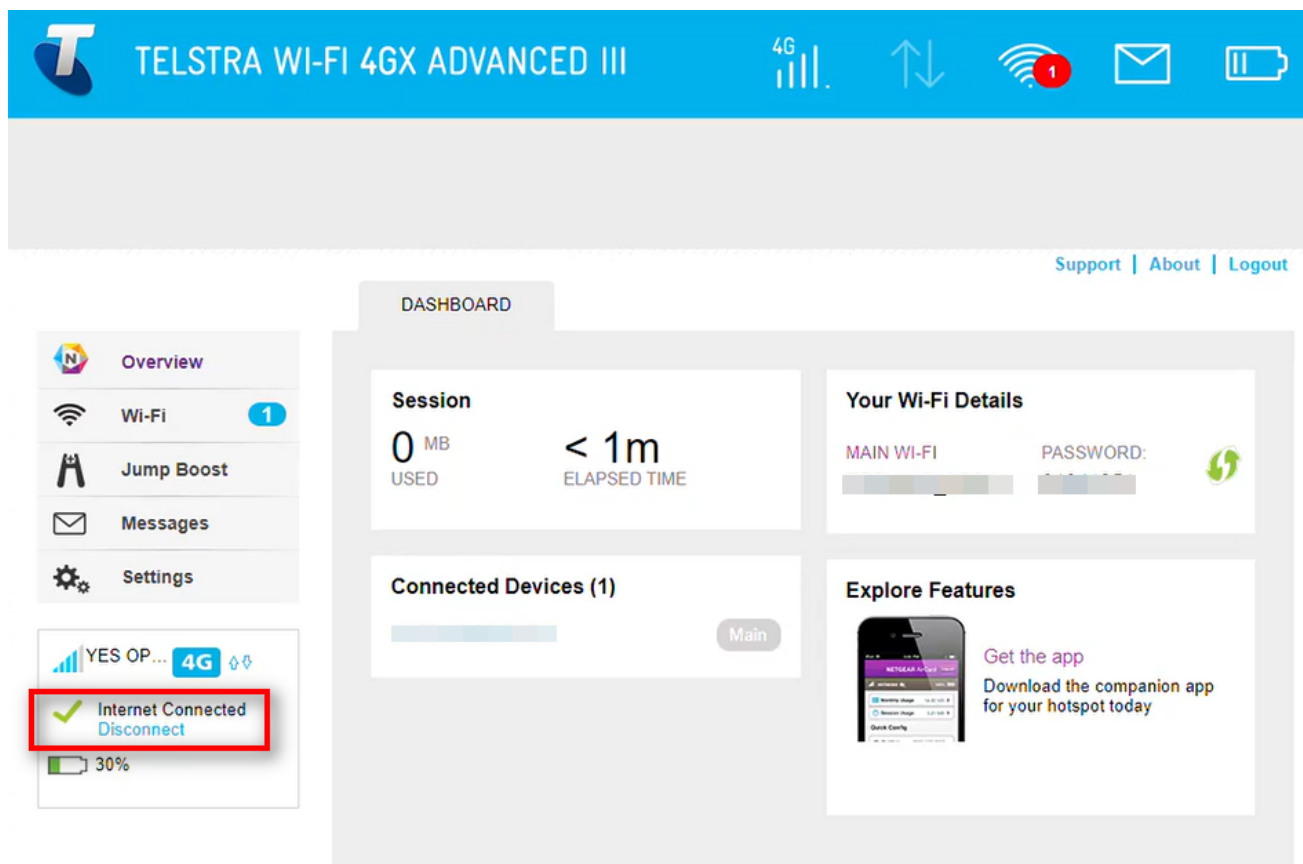

- After entering the required details, click **Save** to store the new APN profile.

## 10. Activate the New Profile

- Select the new profile you just created to activate it.

All set! Your device should be connected to the internet in the next 60 seconds. Check the Overview or status page on your Netgear AC810 to confirm it shows "connected."
