

How to Activate and Set Up eSIM

THINGS TO CHECK

- Internet Connection (Wi-Fi or mobile data)
- Compatible Device
- For iPhone 14 models designed exclusively for eSIM use, activation can be performed without a Wi-Fi network)
- Activated mobile plan for your eSIM
- Updated iOS version

PREPARATION

After your mobile order is approved, you'll need to proceed with the activation of your new service on our website.

- Activating a new number
- Transferring an existing mobile number

Once activated, you'll then receive an email with a QR code which will allow you to activate the eSIM on your mobile phone. An Internet connection (WiFi or mobile data) is required to complete this process.

Note: If you are transferring a number, please wait until your current SIM no longer registers on the network before scanning and installing your eSIM.

INSTALLATION

Option 1: Through QR Code

Option 2: Manual Input
